SUMMARY

A full-stack developer with hands-on experience in scalable, AI-powered web applications. Skilled in React, Next.js, Node.js, MongoDB, PostgreSQL, and Docker. Strong focus on UX and performance.

SKILLS

- React, Next.js, Node.js, Express
- TypeScript, JavaScript, Python, C++
- MongoDB, PostgreSQL
- Docker, Git, Linux, Vercel, AWS
- TensorFlow, PyTorch
- Tailwind, Chakra UI, shadcn/ui
- REST APIs, OAuth2, JWT, CI/CD

CERTIFICATIONS

- Full Stack Web Development (Angela Yu)

HOBBIES

Cooking, Travelling, Blogging

EDUCATION

Bachelor of Technology, VJTI Mumbai (Jan 2022 – May 2026)
CPI: 7.62 / 10.00

LEADERSHIP & EXPERIENCE

Product Development Intern, Aditya Birla Grasim – TRADC
(May–Aug 2025)

- Led the design and prototyping of a sustainable performance garment (SeaCell-based sweatshirt), aligning product intent with market fit and user comfort.
- Managed full product lifecycle: from material selection and fiber engineering to knitting, processing, finishing, and final garment construction.
- Defined technical product specifications (GSM, blend ratios, finish type), tracked quality metrics (IS standards), and iterated based on mechanical and tactile test data.
- Collaborated cross-functionally with textile scientists, process engineers, and design leads to align performance, aesthetics, and manufacturability.
- Delivered a structured technical dossier and product narrative—bridging R&D insights with consumer-facing use cases and sustainable market potential.

Asst. Production, FTII Short Film (May 2023)

- Assisted on-set coordination: props, schedules, and technical logistics.
- Collaborated with creative/technical teams to design set environments.
- Ensured zero scheduling delays through strong organizational skills.

Treasurer, VASTRA '25 @ VJTI (Sep – Dec 2024)

- Managed budgeting for a 300+ participant tech fest; tracked finances and vendor contracts.
- Built a portal for registrations, boosting engagement by 50%.
- Coordinated marketing, logistics, and sponsors for seamless execution.

ACHIEVEMENTS

- Talent Pool, Callus Intl. Internship (2024)
- Smart India Hackathon Inter College Finalist (2024)
- District Chess, State Hockey Player

PROJECTS

Nesternity—A Freelancer OS (Jul '25)

- Designed and built a full-featured SaaS application for freelancers and small agencies using Next.js, TypeScript, Tailwind CSS, and Prisma.
- Integrated modular Kanban boards, invoicing with downloadable PDFs, client CRM, and activity tracking into one unified system.
- Implemented optimistic UI updates, skeleton loading states, and modular API routes to enhance UX and responsiveness.
- Authenticated users via Supabase Auth with secure PostgreSQL backend, and followed a microservice-ready architecture.

FarmWise (Jul '24 – Present)

- Developed a full-stack ML-powered web app for farmers to identify crop diseases via image upload (TensorFlow, React, Node.js).
- Engineered a responsive React frontend with region-specific diagnosis suggestions, reducing guesswork by 40%.
- Built Node.js/Express APIs for image handling and user management; stored data in MongoDB.
- Pivoted to a high intensive research project to innovate and improve the efficiency of the model around 90%
- **Links:** [GitHub](#)

Manga-Styled Portfolio Frontend

- Built a responsive, manga-inspired portfolio UI with Next.js, TypeScript, and Tailwind CSS.
- Enhanced custom components and dynamic routing for blog, projects, and photography.
- Integrated SEO and Open Graph metadata
- **Links:** [GitHub](#) | [Live Portfolio](#)

E-Commerce Website - MachaCo (Present)

- Developed a Next.js-based store with Clerk authentication, cart, and checkout workflows.
- Implemented high end Sanity schema CMS for managing the content in real time, for payment gateway used Stripe payments.
- Ensured mobile-first responsiveness; achieved Lighthouse 82+.

A Concept Experience Site - ParathaFul (Jun '25)

- Built a scroll-driven showcase with Next.js, TypeScript, Tailwind CSS, and GSAP ScrollTrigger.
- Developed responsive sections with modern imagery and a dynamic form interface.
- Optimized performance to achieve a Lighthouse scores, FCP of 0.8 s 94, Speed Index of 2.3 s 49, and Total Blocking Time of 0 ms 100.
- **Links:** [GitHub](#) | [Live Site](#)

Scheduler Web App (Oct – Nov '24)

- Designed a drag-and-drop calendar tool in Next.js, TypeScript, Tailwind CSS with PostgreSQL backend.
- Introduced tags and notifications; increased engagement by 25%.
- Deployed on Vercel with GitHub Actions CI/CD.
